

To the FCC,

I can not believe that the FEDERAL COMMUNICATIONS COMMISSION is indorsing a technology such as BPL that will destroy short wave listening, ham radio and even AM COMMERCIAL BROADCAST BANDS!! The evidence is over whelming to say the least that BPL will virtually eliminate easy listening to short wave broadcast, ham radio, and even AM Broadcast. Power lines already effect AM Commercial Broadcast frequency's emincely!! I',m sure you have driven along or under those big power cables and heard your car radio go berserk!!!!!! As and avid short wave listener and ham radio operator and a sports talk AM radio listener, I beg you to reject BPL to perserve our way of life. Steve Smith, 1900 Elliott Rd.; Gadsden, Al 35904 Amatuer Radio Station WB4NBP (Amatuer liscense held since 1969) I know of which I speak!!!!!!!!!!
